

Spring Event 2022 - Hosted by Hochschule Luzern, Rotkreuz

Location:
Hochschule Luzern - Informatik
Campus Zug-Rotkreuz
Suurstoffi 1, Raum 422
6343 Rotkreuz

Wednesday, 18th of May 2022
14:00 - 17:30h, followed by an Apéro

Introduction

We, the board of the SmartCard Forum Schweiz, are delighted to be able to finally resume our Forum events after the pause due to the Covid-19 pandemic.

At the Forum you will get information on several of the latest developments in Smart Cards and the related technologies. UBS AG will elaborate on a new community platform for new technologies and emerging business models in the digital financial services sector.

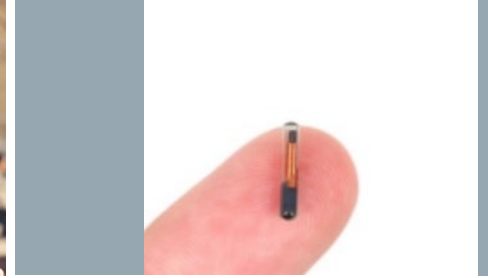

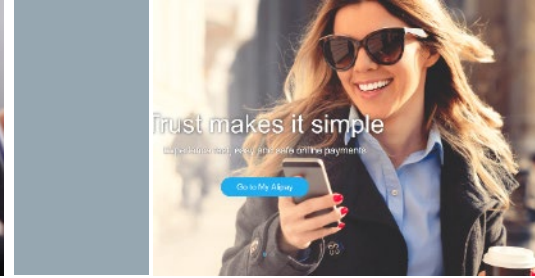

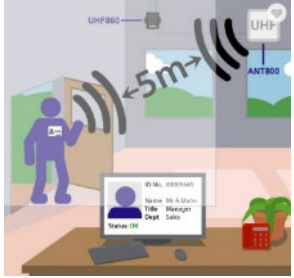

In our second presentation, Brunata AG will show how the Switsercloud IoT Platform is constantly growing and expanding, and how companies can use the cloud-based approach to keep their own investments and operating costs low and concentrate on innovative solutions for their customers.

In our third presentation, a representative of the host of this event, of Hochschule Luzern will motivate and outline the technology that makes Bitcoin work.

Finally, our last presentation will be given by LEGIC Identsystems AG. The topic is yet to fixed; possibly in relation to the new Swisspass.

We very much appreciate the Department of Computer Science of the Lucerne University of Applied Sciences and Arts hosting this event.

René Meier
Chairman SmartCard Forum Schweiz

Programme

- 14:00 **Welcome and Introduction**
Moderation: Paul Aebi, SmartCard Forum Schweiz
- 14:05 **Mobey Forum – Managing Finances Digitally**
Beat Bannwart, UBS AG

- 16:00 **Blockchain 101**
Alexander Denzler, Hochschule Luzern
- 16:45 **Topic to be defined**
LEGIC Identsystems AG
- 17:30 **Apéro**

Beat Bannwart, Head Innovation Solutions & Partnerships UBS Group Chief Digital Office, UBS AG

This presentation gives an insight into the Mobey Forum, a leading knowledge and networking platform for new technologies and emerging business models in the digital financial services sector. The Mobey Forum is a unique community that provides its members with insights on current topics in a personal network as well as an informal exchange on experiences that cannot be googled

André Calligaris, Director, Brunata AG

The Switzercloud platform makes it possible to provide ready-to-use IoT solutions according to the motto "unpack, plug in, run!". It will be shown how IoT data from sensors can reach the Switzercloud, be processed there and be forwarded to third-party applications. It will be explained how sensors and IoT platform can be connected to work together as an end-to-end service.

Alexander Denzler, Co-Head Information Systems Lab, Hochschule Luzern - Informatik

Cryptography and Blockchain are becoming ever more omnipresent in today's society. An introduction to the world of the largest digital currency will outline what Bitcoin is and explain the technology that makes it work.

LEGIC Identsystems AG

The topic of this presentation is to be defined.

All participants are kindly requested to register until the **15th of May** via email to rene.meier@hslu.ch.

Participation for members and students is free of charge. Please ensure to register early.
